## MASTER OF SCIENCE IN GLOBAL OPERATIONS AND PROJECT MANAGEMENT

# WHERE WILL YOUR BUSINESS KNOWLEDGE TAKE YOU?

To a more sustainable business world.

Rethinking products and processes in ways that make better use of both human and natural resources is the hallmark of a progressive, sustainable company. Global organizations are looking for a new kind of manager—someone who understands complex systems; someone who can not only be a member of a team, but can also lead that team; and someone who can help develop and implement sustainable business practices.

The Master of Science in Global Operations and Project Management leverages the innovative knowledge base of Lawrence Technological University's Center for Sustainability to provide you with both an understanding of global operations and project management along with cutting-edge courses that focus on sustainable business practices that protect people, resources, and profits.

### THE MASTER OF SCIENCE IN GLOBAL OPERATIONS AND PROJECT MANAGEMENT:

- Gives you a solid understanding of how business processes and systems are designed, developed, and implemented in a sustainable environment.
- Develops both operations and project management skills so you'll stand out from the competition.
- Expands your earning potential.
- Prepares you to manage sustainable and global business practices in growth industries such as defense, information technology, and new product development.
- Provides online, hybrid, and on-ground learning options.
- Gives you the foundation to pursue PMP certification.

"We assist our students to blend self-reflection with practical course work so they can develop a personal formula for academic and professional success."

*Robert Inskeep, PhD*
