

Joongsub Kim, PhD, RA, AIA, AICP
Executive Summary of Achievements

Summary Statement:

Joongsub Kim's work centers on "engaged scholarship." Deeply rooted in community engagement and applied research, his scholarship follows Social Construction, Participatory Action Research and Practice, and Architect as Facilitator, among the nine public interest design and practice research (PID[PR]) models proposed by him (published as a chapter in a book entitled *Handbook of Socially Engaged Architecture* in 2018 by Routledge, New York). Dr. Kim has enriched architecture through his teaching, research, service, and leadership by advancing the national discourse on significant urban challenges, social justice, community identity, and service values in architecture, while also establishing alternative practices that empower some of Detroit's most challenging communities.

Impacting National and International Dialogues: Dr. Kim's significant research in the global challenge of urban growth and shrinkage, sustainable communities, alternative urbanisms, urban communication, community identity, urban design review, and community development capacity building systems resulted in 20 national and international grants, including a National Endowment for the Arts Grant, a Knight Foundation Arts Challenge Grant, a National and Community Service America Grant, a grant from the Urban Communication Foundation in partnership with the Environmental Design Research Association, Graham Foundation Advanced Studies in the Fine Arts Research Grants, Yonsei University-Korean Government Urban Regeneration research grants, and Congress for the New Urbanism research grants. Dr. Kim was featured in more than 50 national and international publications and presentations, including the *Journal of Urban Design, Environment & Behavior, Urban Design International, the Architectural Research Centers Consortium Journal, Places, Architectural Record, Architect, IN_BO Journal (Italy), Open House International Journal (UK)*, the Association of College of Schools of Architecture (ACSA) national conferences, the international Making Cities Livable Conference, and conferences at Oxford University, England; University College Dublin, Ireland; Yonsei University, Korea; and Harvard University. Dr. Kim's work in design review, involving design reviewers in 50 states in the United States was written for a book and will be published in 2018 by Springer Press. His most recent scholarly projects in socially responsive development, smart cities, alternative practice models, urban communication, and healthy urbanism were also written for a book (under review by Springer Publisher). Dr. Kim, as an expert in engaged scholarship, was an "Invited Referee / Examinateur" for the International Insight Grant Application, Social Sciences and Humanities Research Council of Canada in 2016 and 2018. He is also the principal investigator for the national and international community development systems research in 2017–2018 (funded by the Kellogg Foundation and the Erb Foundation) to support the citywide initiative of Building the Engine of Community Development in Detroit (BECDD).

In addition, Dr. Kim revived the dormant American Institute of Architects (AIA) Detroit Urban Priorities Committee (UPC), which then received an AIA National grant. During 2010–11, he organized 4 symposia and exhibits entitled "Detroit by Design 2011" where 120 architects from around the world submitted their work. He convened experts and citizens for dialogues on the "shrinking city" phenomena, focusing on urban centers, transportation, urban agriculture, and landscape. The event received national attention and was featured in the AIA magazine *Architect*, culminating in a book called *Detroit by Design 2011*, co-edited by Dr. Kim. The event also stimulated numerous proposals in 2012, one of which was an international ideas competition organized by the UPC, in which 400 architects from around the world participated. The competition received international and national attention, being presented the book *Detroit by Design 2012: International Riverfront Competition*, which was co-edited by Dr. Kim. The competition is the subject of research by members of several universities, including Columbia University, and is used as a national model for an ideas competition and civic engagement by AIA chapters, such as

AIA Colorado and AIA Ohio. In addition, the competition inspired a significant community outreach effort in 2013, called the “Jefferson-Chalmers Pop-Up Retail Project” along Detroit’s riverfront. This event, led by Dr. Kim and key members of the UPC in collaboration with several communities, received extensive citywide attention and media coverage, such as Model D. Dr. Kim was among the handful of faculty members chosen from across the country to join the AIA National Research Summit, a task force advising the AIA on its national research policy in 2015 and 2017. Dr. Kim has been serving on the AIA National Committee on Regional and Urban Design since 2014. He also received the AIA Michigan Chapter President’s Award in 2012 and AIA Detroit Chapter Charles Blessing Award in 2015, in recognition of his “outstanding contributions to the advancement of the built environment.”

Creating Architecture through Alternative Practices: Dr. Kim’s work transcends the boundaries of architecture, incorporates other disciplines, and integrates the academic with the practice. Through more than 60 of Dr. Kim’s studio projects and research studies, he managed to expand the influence of the architectural profession. His social construction/justice model as an alternative practice won first prize in the 2005/2006 International Architectural Education Competition, which was judged by renowned experts, including Professor Henry Sanoff and was published in *Open House International, England*. Dr. Kim established two volunteer group initiatives, Good Deeds Good Design Group in Detroit ([GD]³) and Public Interest Design Practices and Research (PID[PR]), expanding the scope of architectural engagement by promoting alternative practices and earning a national grant from NCARB (National Council of Architectural Registration Boards). In addition, Dr. Kim organized a unique international PID[PR] competition in 2012 that encouraged the collaboration between the public and architects through social media. Dr. Kim co-organized and hosted the Structures for Inclusion International Conference in Detroit, a leading international forum in public interest design and socially responsible development, in partnership with Design Corps, Raleigh, North Carolina. Dr. Kim’s work has been disseminated nationally and internationally through more than 60 presentations and peer-reviewed articles, and he earned national research grants from the Boston Society of Architects and the Graham Foundation.

Empowering the Toughest Communities: Dr. Kim’s pioneering work, through his student-based Lawrence Technological University Detroit Studio (ltu-DS), focuses on small and troubled communities that face brutal realities in the trenches of America’s most challenging city. He provides opportunities for design-based social learning that benefits professionals, architecture students, residents, and their children, educating them on the power of design, while changing their world views. As Director of the Detroit Studio and an educator and facilitator, Dr. Kim works with “small heroes” and grassroots organizations, collaborating with 2,000 citizens in 50 neighborhoods during 18 years. His story was published in 2006 in the book *From the Studio to the Street*, which was co-sponsored by the AIA, the U.S. Department of Housing and Urban Development, ACSA, the Association of Collegiate Schools of Planning, and the American Association for Higher Education. According to the editor William Zeisel, the book was the first in the nation to make a formal connection between service-learning pedagogy and architectural practice. The Detroit Studio has been the subject of research studies as a successful example of a grassroots-based design center by scholars in Germany, Turkey, and Korea, and universities in California, Louisiana, North Carolina, Oregon, Pennsylvania, and West Virginia. Dr. Kim also received the 2003–2004 ACSA /AIAS National New Faculty Teaching Award. He fostered collaboration among various groups to promote sustainable communities and regional sustainability and received the 2006–2007 ACSA National Collaborative Practice Award citation and national grants from several agencies, including the Adaptive Environments Center, Boston, the National Endowment for the Arts, Knight Foundation, and the American Architectural Foundation, Washington, D.C., in collaboration with the AIA.

Section 1: Summary of Academic and Outreach Work

Joongsub Kim, PhD, RA, AIA, AICP is a full professor in the faculty of the College of Architecture and Design (CoAD), at Lawrence Technological University (LTU). He also serves as a design and planning consultant for organizations, in both Korea and Michigan. He has a joint graduate architectural science and planning degree (MIT, Cambridge, Massachusetts), a PhD in architecture-environmental psychology (University of Michigan, Ann Arbor), a graduate architecture degree (Nebraska), and an undergraduate architectural engineering degree (Hong-Ik, Korea).

Dr. Kim received a number of awards and grants, including a 1999 Lincoln Institute of Land Policy National Doctoral Dissertation Research Fellowship; a 2003 Architecture for Social Justice Award sponsored by the Adaptive Environments Center, Boston, and the National Endowment for the Arts; and a 2003–2004 Association of Collegiate Schools of Architecture (ACSA)/American Institute of Architecture Students (AIAS) National New Faculty Teaching Award.

Other awards received by Professor Kim since 2006, include a 2006 International Architectural Education Competition Award (First Prize and Publication Award) sponsored by Open House International Journal, UK; a 2006 Boston Society of Architects National Research Grants award; a 2006–2007 ACSA Collaborative Practice Award Citation; a 2008 Graham Foundation Advanced Studies in the Fine Arts Research Grants Award; 2006, 2007, 2008, 2009, and 2012 awards from the American Architectural Foundation, Washington DC; 2008 and 2015 Mary E. and Richard E. Marburger Distinguished Achievement Awards - The Champion for Institutional Excellence and Preeminence from Lawrence Technological University; the inaugural Michael Brill Grant Award in Urban Communication and Environmental Design, sponsored by the Urban Communication Foundation and the Environmental Design Research Association; the 2011 NCARB (National Council of Architectural Registration Boards) National Grant Award for the Integration of Practice and Education in the Academy; a 2016 NEA (National Endowment for the Arts) Art Works Grant Award (design category); a 2016 Knight Foundation Arts Challenge Grant Award; grant awards from Kellogg Foundation and Erb Foundation for the national and international research scan in community development in 2017; and a grant award from the Michigan Humanities Council (in association with the National Endowment for the Humanities) in 2018

Equally, Professor Kim received a 2012 AIA Michigan President's Award and a 2015 AIA Detroit Charles Blessing Award for "outstanding contributions to the advancement of the built environment by an influential architect." He revived the dormant AIA Detroit Urban Priorities Committee, leading it from 2010 to 2014. Currently, he serves on the AIA National Committee on Regional and Urban Design. He was invited to the AIA National Research Summit 2015 and 2017 to advise the AIA on its national policy on promoting research in practice through collaboration between the academy and professionals. He also brought the 2015 Structures for Inclusion international conference, a leading advocacy conference of socially responsible design, to Detroit and co-chaired it.

Dr. Kim directs the CoAD-based The Detroit Studio, a community-based program. The Detroit Studio projects focus on small communities that face brutal realities in the trenches of America's most challenging city. The studio also provides opportunities for design-based social learning that benefits professionals, architecture students, residents, and their children, educating them on the power of design and changing their world-views. As Director of the Detroit Studio and an educator and facilitator, Dr. Kim works with "small heroes" and grassroots organizations on various community-based projects.

The mission of The Detroit Studio is educational, as it provides students with an enriched educational experience through community-based architectural, urban design and community development projects, while offering accessible and useful programs and information to the public, design profession, municipal officials and business community.

The Detroit Studio is an off-campus studio facility, founded in 1999 by the CoAD at LTU, located in midtown Detroit. Its location in central Detroit creates a unique educational setting for students, while its long-term commitment to working with Detroit neighborhoods distinguishes it from the programs of other local universities. The Detroit Studio is committed to serving communities in Detroit, Wayne County and Southeastern Michigan as part of the mission of a local university, through Service Learning projects that utilize interdisciplinary collaboration and teamwork to address real needs, problems and potentials. The projects developed at The Detroit Studio serve communities in areas of Urban Design, Planning, and Sustainable Community Development. The studio establishes partnerships with municipalities, design professionals, professional organizations, community organizations, business leaders, and local schools and universities.

Dr. Kim has collaborated with nearly 2000 participants and 150 organizations in 50 communities over 18 years, through more than 60 studios at the Detroit Studio program. Dr. Kim also founded and directs two design and research groups called [GD]³ (Good Deeds Good Design Group in Detroit) and PID[PR] (Public Interest Design Practices and Research). He published journal articles and book chapters on the areas of service learning, architectural pedagogy, design review, New Urbanism, sustainable urban design, sustainable community revitalization, and environment psychology. His articles have been published in peer-reviewed journals including *IN_BO (Italy)*, *Urban Design International*, *Journal of Urban Design, Places, Environment & Behavior*, *Open House International (UK)*, and *Architectural Research Centers Consortium Journal*. Also his work has been mentioned in design or professional magazines including *Architectural Record* and *Architect (the national magazine of the AIA)*.
