Notes.

1. EEE 4842 is to be taken in the very last semester, EEE 4831 and EEE 3011 are to be taken in the 2nd to last semester. This ensures that students in the Senior Projects sequence are maximally prepared for a culminating major design experience as required by ABET.
2. Ovals indicate “critical path” courses. That is, courses that are critical pre-requisites to later on courses. Advice: take these courses as soon as possible.
3. Some courses have pre-requisites based on ACT scores or placement test scores.
4. The flow chart complies with pre-requisites and co-requisites in place at the time it was created.
5. Students must adhere to the actual pre and co requisites in place at the time they take a course.
